

# USB Powerpoint Placement Checklist

Use this checklist to determine the best locations for USB-integrated powerpoints in your home:

## **General Considerations:**

- ✓ Do you frequently charge devices in this area?
- ✓ Will USB powerpoints reduce clutter and free up traditional sockets?
- ✓ Is this a high-traffic zone where multiple devices need charging?

## **Room-Specific Placements:**

### **Kitchen**

- ✓ Near benchtops and food prep areas for recipe tablets and phones
- ✓ Coffee station for charging smart assistants or kitchen devices
- ✓ Breakfast bar for family charging convenience

### **Bedrooms**

- ✓ Beside beds for overnight charging of phones and smartwatches
- ✓ Near dressing tables for grooming tools with USB charging

### **Home Office**

- ✓ Desk area for easy access to device charging
- ✓ Behind or under the desk to reduce cable clutter
- ✓ Meeting room or study nook for shared device charging

### **Living Room**

- ✓ Near entertainment units for charging remotes, controllers, and tablets
- ✓ On side tables for guests to charge devices
- ✓ Behind couches for discreet charging stations

### **Bathrooms**

- ✓ Near mirrors for electric toothbrushes and shavers
- ✓ Near storage areas for grooming devices

### **Outdoor Areas**

- ✓ Patio or deck for outdoor speaker and phone charging
- ✓ Garage for tools and battery-powered devices

Ensure your home is future-ready with the convenience of USB-integrated powerpoints.
